Understanding your report and getting to action!	The results in this report give you summary information.
01.	Identify the areas where you are performing well.
02.	Identify areas that need improvement.
03.	Consider if there is actually room for improvement.
04.	Consider the impact of high neutral responses (lots of employees ticking 'neither agree nor disagree')
05.	Take action – think 'quick wins', short term and long term.
06.	Resources

Take the time to fully understand this report and digest the results.

Consider your response rate and if it is representative of the views of your colleagues.

These will tend to be high results which are notably above any comparative results. These should be celebrated. Share the good news with employees.

These will be the lower results, and/or those which are scoring notably below your comparators. Consider discussing these areas with your colleagues in focus groups or individually or team meetings, gather their thoughts and solutions before deciding on actions to take.

This report shows the proportion of colleagues responding positively (strongly agree + agree), neutrally (neither agree nor disagree) or negatively (disagree + strongly disagree) to the question asked in the survey. Look at how your positive scores compare to your parent unit, and your last survey's results.

Ask your colleagues about their views to find out what is causing this. More communication and involvement may help to shift them to a positive frame of mind.

Encourage all colleagues to help with action planning and implementation.

Think about what you want employees to be saying about their working lives in the future and what should be put in place to make this happen.

It may be helpful to discuss with your manager or other colleagues (your peers, HR, subject experts) to share ideas before developing plans for action.

% Positive: Where results are shown as positive percentages (% positive), these are calculated by adding together positive responses ('Strongly agree' + 'Agree') and dividing by the number of respondents who answered the question.

Anonymity: It is Engine's practice not to display the results of groups of respondents to the extent where the anonymity of individuals may be compromised. Results will not be shown where there are less than 10 respondents in a group.

Comparisons with results from previous years: The method of analysing and reporting specific results may be periodically reviewed and revised. Such improvements are applied to current data and that of previous years. For this reason the current report is always the most accurate data source for APS employee census results, including comparisons with time series data.

Results are presented as whole numbers for ease of reading, with rounding performed at the last stage of calculation for maximum accuracy. Values from x.00 to x.49 are rounded down and values from x.50 to x.99 are rounded up. Therefore in some instances, results may not total 100%.
